

Lightweight. Durable. Flexible.

Quick Fitting Inc. is proud to introduce...

COPRO EverPEX, an environmentally friendly cross linked polyethylene tubing. COPRO EverPEX is easily bent to accommodate corners and curves, and requires fewer fittings. This allows for a quick and easy installation!

COPRO EverPEX is corrosion resistant and has an increased capacity for expansion, making the piping burst resistant. Connect COPRO EverPEX to COPRO push-connect fittings and valves effortlessly with **no inserts!**

#### Common Applications:

- ✓ Plumbing (hot and cold water applications)
- ✓ Radiant Heating (floor/slab heating)
- ✓ Snow-melting
- ✓ Solar/Swimming Pool Heating
- ✓ Agricultural and Turf Applications

#### Certifications & Approvals:

- ✓ NSF, NSF 14/ANSI 61
- ✓ ASSE 1061 (requires use of a tube stiffener)
- ✓ UPC
- ✓ NSF Protocol P171 (for chlorine resistance)
- ✓ CSA B137.5
- ✓ IGC-188 (requires use of a tube stiffener)
- ✓ IPC
- ✓ ASTM F2023, F877, F876

#### Advantages of using COPRO EverPEX:

- ✓ Flexibility (both physically and in application)
- ✓ Ease of installation
- ✓ Light weight construction
- ✓ Fewer fittings required
- ✓ Increased capacity for expansion
- ✓ Lead free (no solvents or cements needed for installation)
- ✓ Extreme temperature resistance-suitable for use with water up to 200° F and in applications where ambient temperatures drop below freezing
- ✓ Compatibility with existing copper tubing, CPVC and other CTS pipe

innovation at work.

## COPRO EverPEX

**List Pricing**  
as of May 1, 2008

COPRO EverPEX is produced in copper tube sizes (CTS) with SDR-9 class.

### Specifications

- \*Rated at 160 psi at 73° F
- \*Rated at 100 psi at 180° F
- \*Rated at 80 psi at 200° F
