

TOPIC: Why choose ProBite™

DATE: 3/30/2009

SUMMARY: Features and Benefits

What are the benefits of ProBite push connection technology?

- ✓ ProBite fittings and valves are full flow (No inserts)
- ✓ ProBite offers a full range of fittings, valves and stops.
- ✓ ProBite fittings and valves are priced up to **45% less** than competition
- ✓ The ProBite line is designed with professional grade, low lead brass
- ✓ Connection is heat free which reduces the risk of fire hazards
- ✓ Connection will always be clean and professional, as you will never need glue, flux or solder
- ✓ The ProBite line works with Copper, CPVC and PEX lines, allowing you to join various types of piping with a single fitting or valve.
- ✓ No damage to pipe ends upon installation and removal
- ✓ Installs in seconds, 12 times faster than soldering
- ✓ ProBite fittings and valves are removable and reusable
- ✓ ProBite fittings are repositionable
- ✓ ProBite sealing O-rings are replaceable
- ✓ Fittings are designed to operate at temperatures ranging from 0° to 250°F
- ✓ ProBite is tested by IAPMO to 200 PSI, and has a separation force exceeding 600 lbs.
- ✓ ProBite is proud to carry the industries best warranty - **75 YEARS!**

What are some common ProBite™ applications?

- ✓ Oil-free compressed air
- ✓ Vacuum systems
- ✓ Chilled water
- ✓ Hot water
- ✓ Car wash applications
- ✓ Inert gases
- ✓ Potable water
- ✓ Fluid transfer
- ✓ Permanent or temporary plumbing service
- ✓ Water treatment systems
- ✓ In-wall applications (no Access panel)
- ✓ Below ground plumbing
- ✓ Hydronic heating
- ✓ In-plant cooling systems

What is the estimated market size for ProBite™ fittings?

- ✓ There are over 350,000 manufactures in North America
- ✓ North America has over 14 million businesses
- ✓ There are over 160 million households, which include 102 million homeowners in the U.S. and another 12.5 million households in Canada.

How does ProBite compare on installation?

- ✓ ProBite carries a 75-Year warranty, while most crimp technology is warranted for 1 – 5 years
- ✓ ProBite installs easily, requiring no expensive tools. Both crimp and press fittings require expensive clamping tool to secure the fitting.
- ✓ ProBite can be used on Copper, CPVC, and PEX, while crimp and press technology cannot.
- ✓ Simply, cut, clean, mark the tubing, push to connect and you are done!
- ✓ At an estimated \$65.00 per hour, the current cost of soldered pipe installation is approx. \$13.55 per foot.
- ✓ ProBite fittings are estimated to install in less than 1/12th of the time required by conventional soldering.
- ✓ Minimal expertise is required to install ProBite, while copper soldered installation is often left to trained professionals.
- ✓ Crimp fittings require expensive stub outs, bend clamps and supports, which are not require in the installation of ProBite.
